

# How we are keeping you safe

Your safety is our priority - we are committed to following the Government's COVID-19 guidelines and the latest advice from Public Health England to ensure your safety is paramount whilst on campus. The following measures are revisited regularly to keep them up-to-date, and we ask all staff, learners and visitors to adhere to these rules for everyone's health and safety.

## Lateral flow kits testing

It's advised that that you have two tests a week, two to three days apart, if you do not have access to lateral flow kits we can provide them, but you should do these prior to attending a tutorial/session as we cannot carry these out on site. Tests results should be registered online and you will receive a text message which you can share/show on arrival. Though testing cannot be mandated it is strongly advised.

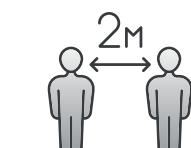

## Track and trace

A QR code is available to log location via the NHS Track & Trace App as you sign in to the campus.

## Face coverings

Members of staff will continue to wear face coverings in all communal spaces and when moving around the campus, as well as maintaining social distancing.

We encourage our learners to also wear face coverings when moving around on campus and to maintain social distancing measures as we all work together to keep everyone safe. For information about our exemption policy, contact your lecturer.

## Sanitisation requirements

There will be materials to sanitise and clean workstations/surfaces, computers, hands etc will be available. Windows will be open to allow good ventilation in each room.

## Food and drinks

You should bring drinks, cutlery and food, as communal spaces will be limited/may not be available, breaks will be co-ordinated to allow sufficient time to grab a bite off site, if necessary. You should bring your own pens and notepads, laptops and any other equipment you may require.
